SE LAB2

TITLE: Municipal Infrastructure Damage Reporting App

DELEVERABLES:

Epic and the respective User Stories:

☐	> Work	Assignee	Reporter	Priority	Status
☐	⚡ MIDRA-1 Epic 1: Citizen Damage Reporting	Unassigned	N Ram Sai Govind	= Medium	Done ▾
☐	☑ MIDRA-5 1.1 Submit Damage Report	Unassigned	N Ram Sai Govind	⬆ Highest	Done ▾
☐	☑ MIDRA-6 Story 1.2: Geo-tag Location	Unassigned	N Ram Sai Govind	⬆ High	Done ▾
☐	☑ MIDRA-7 Story 1.3: Select Damage Category	Unassigned	N Ram Sai Govind	= Medium	Done ▾

☐	⚡ MIDRA-2 Epic 2: Report Triage & Prioritization	Unassigned	N Ram Sai Govind	= Medium	Done ▾
☐	☑ MIDRA-8 2.1 View Incoming Reports	Unassigned	N Ram Sai Govind	⬆ Highest	Done ▾
☐	☑ MIDRA-9 2.2 Assign Severity Level	Unassigned	N Ram Sai Govind	⬆ High	Done ▾
☐	☑ MIDRA-10 Story 2.3: Assign to Department	Unassigned	N Ram Sai Govind	= Medium	Done ▾

☐	⚡ MIDRA-3 Epic 3: Work Order & Repair Tracking	Unassigned	N Ram Sai Govind	= Medium	Done ▾
☐	☑ MIDRA-11 3.1 Receive Work Order	Unassigned	N Ram Sai Govind	⬆ High	Done ▾
☐	☑ MIDRA-12 3.2 Update Repair Status	Unassigned	N Ram Sai Govind	= Medium	Done ▾
☐	☑ MIDRA-13 3.3 Log Completion Details	Unassigned	N Ram Sai Govind	⬇ Low	Done ▾

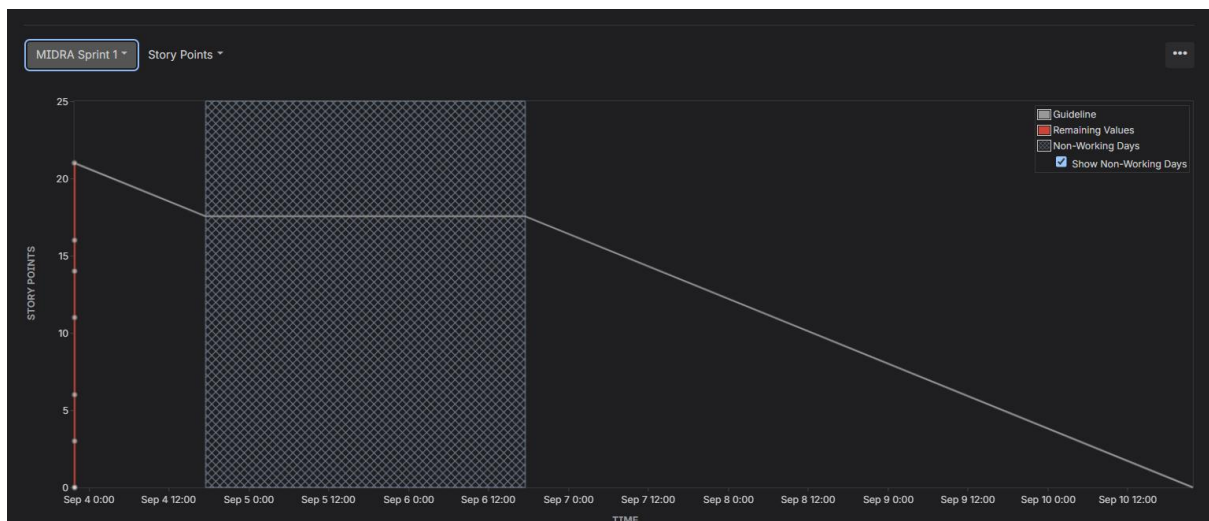

⏷ ⚡ MIDRA-4 Epic 4: Public Transparency & Notifications	Unassigned	N Ram Sai Govind	= Medium	Done ▾
☑ MIDRA-14 4.1 Track Report Status	Unassigned	N Ram Sai Govind	= Medium	Done ▾
☑ MIDRA-15 4.2 Receive Completion Notification	Unassigned	N Ram Sai Govind	⬇ Low	Done ▾

Burndown Charts:

Sprint2:

Sprint1:

Questions:

1. Did your estimations reflect the actual effort?

Mostly yes. Submit Damage Report was given 5 points, and it really did take more work since there was a form to fill out, a photo to upload, and some checks to make sure the info was valid. Compare that to Select Damage Category, which was just 2 points and was basically picking an option from a dropdown, so it went a lot quicker. The one story that felt off was Assign to Department. I gave it 3 points thinking it would be simple, but figuring out which department should get which type of report actually took more thinking than expected. That is pretty normal though, you do not always get the estimate right the first time, and it gets easier to guess correctly the more sprints you run.

2. Was your backlog well-prioritized?

For the most part, yes. The two most important stories, Submit Damage Report and

View Incoming Reports, were the first things worked on in Sprint 1, which makes sense since the whole app does not really work without them. If I did it again I would move Assign Severity Level up too, since knowing how urgent a problem is should probably happen right away and not later in the sprint.

3. How did your simulated sprint align with your plan?

Most of the stories got finished within the sprint. One that did not was Log Completion Details. It got stuck because it needed Receive Work Order to be done first, and that one took a bit longer. So it carried over to the next sprint. That showed me that some stories depend on others being finished first, and it is risky to plan them in the same sprint unless there is extra time built in.

4. What insights did the burndown chart give?

The chart showed steady progress in the middle of the sprint, but the first couple days were kind of flat. Work was happening but it was not being marked Done yet. That is a reminder to update the board more often instead of doing it all at once. Then near the end there was a big drop where a bunch of stories got marked Done close together. That probably means some stories were either a little too easy for the points I gave them, or people just got a bunch of stuff done right before the deadline instead of spreading it out.
